JC17 Rec'd PCT/PTO 27 JUN 2005

IN THE CLAIMS

Claim 1 (original): A device for localisation of stereotactic coordinates for identifying a spatial position of a region of interest in an individual's skull for the performance of stereotactic procedures, said device comprising a box of non-magnetic, radiolucent material with fiducial markers and said device being attachable to a stereotactic frame.

Claim 2 (original): A device according to claim 1, wherein said fiducial markers includes skull fixation pins projecting inwardly into the interior space of the box.

Claim 3 (currently amended): A device according to claim 1 [or 2], wherein said box including at least one attachable side plate means made of translucent or transparent and radiolucent material.

Claim 4 (original): A device according to claim 3, wherein said at least one side plate means further including fiducial reference lines allowing for identification of an area of interest.

Claim 5 (currently amended): A device according to ~~any of the preceding claims~~ claim 1, wherein said device comprises a nose fixation clamp.

Claim 6 (currently amended): A device according to ~~any of the preceding claims~~ claim 1, wherein said device is adapted to fit like a drawer under the stereotactic frame, when being attached thereto.

Claim 7 (currently amended): A device according to ~~any of the preceding claims~~ claim 1, wherein said box comprises a top part and a bottom part fitting together with a ridge and groove in the sides of the top part and the bottom part.

Claim 8 (original): A device according to claim 7, wherein said box is provided with a locking mechanism to allow for the top and bottom parts being fixed to each other.
